

Amendments to the Specification:

On page 10 of the specification, please replace paragraph [0049] with the following amended paragraph:

[0049] In addition, a user[s] may choose a native language Internet address or e-mail account name. If the internet address or e-mail user name is taken, the user may enter a different choice. At the end of the registration process, the system may will generate a Web page or e-mail account. At the sub-site level, the internal name assignment system will work in a similar fashion to the way the system works in the direct translation portion of the system. Thus, using the two tier transformation system, i.e., the combination of the words and letter every web site owner will have their sub sites translated automatically as well.
